

Novade Prefabrication MEP

A leading digital QA/QC and production monitoring software for specialist contractors & suppliers

Digitise all QA/QC workflows

- Manage your QA/QC workflows – including standard processes and site inspections easily in a single request
- Implement STAS' standard checklists to monitor critical status and keep records of documentation inclusive of photo evidence and audit trails
- Access module history or fabrication data using QR codes in real time

Gain visibility on pre-fabrication operations

- Monitor pre-fabrication operations from sub-assemblies off-site to the installation on site
- Identify bottlenecks and take corrective actions easily (potential late deliveries, missing components, incorrect installations etc.)
- Track all components' status in real time using the Novade dashboard

Web & Mobile Dashboards

Easily access hundreds of dashboards on any device, anytime, anywhere

Excel Import & Export

Seamlessly import and export Excel files to and from the platform

PDF Export

Generate PDF files for easy sharing and reporting of information
